Attachment 3 – Special conditions for safe use

- i. The apparatus enclosure contains aluminum and is considered to constitute a potential risk of ignition by impact or friction. Care must be taken into account during installation and use to prevent impact or friction. (When installed in a Ga Approval)
- ii. The maximum permitted ambient temperature of the Level Plus Digital/Analog Level Transmitter is $71\text{ }^{\circ}\text{C}$. To avoid the effects of process temperature and other thermal effects care shall be taken to ensure the surrounding ambient and the ambient inside the transmitter housing does not exceed 71°
- iii. Some models contain non-metallic enclosure parts, to prevent the risk of electrostatic sparking the non-metallic surface should only be cleaned with a damp cloth.
