

Data Sheet

G-Series V GP5 Digital Magnetostriuctive Linear Position Sensors

- Digital-pulse output models: PWM or Start/Stop
- LED for visualization of the sensor status
- Field adjustments and diagnostics using the TempoLink® smart assistant

MEASURING TECHNOLOGY

The absolute, linear position sensors provided by Tempsonics rely on the company's proprietary magnetostrictive technology, which can determine position with a high level of precision and robustness. Each Tempsonics® position sensor consists of a ferromagnetic waveguide, a position magnet, a strain pulse converter and supporting electronics. The magnet, connected to the object in motion in the application, generates a magnetic field at its location on the waveguide. A short current pulse is applied to the waveguide. This creates a momentary radial magnetic field and torsional strain on the waveguide. The momentary interaction of the magnetic fields releases a torsional strain pulse that propagates the length of the waveguide. When the ultrasonic wave reaches the beginning of the waveguide it is converted into an electrical signal. Since the speed of the ultrasonic wave in the waveguide is precisely known, the time required to receive the return signal can be converted into a linear position measurement with both high accuracy and repeatability.

Fig. 1: Time-of-flight based magnetostrictive position sensing principle

G-SERIES V GP5 Digital

The Tempsonics® G-Series V brings balanced sensor performance to meet the many demands of your application. The main advantages of the profile version GP5 with digital output PWM and Start/Stop are:

9 positions simultaneously

The G-Series V Digital can detect and report the position of up to 9 magnets simultaneously (controller dependent).

LED for sensor status

The LED in the housing cover visualizes the sensor status. This allows you to see the current status of the sensor at a glance.

Switching output

You can switch the digital output of the sensor from Start/Stop to Pulse Width Modulation (PWM) and vice versa on site.

All settings under control with the smart assistant for the G-Series V

The TempoLink® smart assistant supports you in setup and diagnostics of the G-Series V. Among other things, you can adjust the parameters of the sensor to your application on site or read out information about the current status of the sensor.

For more information of this assistant please see the data sheet:

- TempoLink® smart assistant

TECHNICAL DATA

Output						
Digital pulse outputs	Start/Stop and Pulse Width Modulation (PWM)					
Measured output variables	Position					
Measurement parameters						
Null/Span adjustment	100 % of electrical stroke					
Resolution	0.1, 0.01 and 0.005 mm (controller dependent)					
Update time	Stroke length	≤ 500 mm	≤ 1100 mm	≤ 3000 mm	≤ 6250 mm	≤ 6250 mm
	Update time	500 μs	1 ms	2 ms	4 ms	5 ms
Linearity deviation ¹	< ±0.02 % F.S. (minimum ±50 μm)					
Repeatability	< ±0.002% % F.S. (minimum ±5 μm)					
Hysteresis	< 4 μm typical					
Temperature coefficient	< 30 ppm/K typical					
Operating conditions						
Operating temperature	−40...+80 °C (−40...+176 °F)					
Humidity	90 % relative humidity, no condensation					
Ingress protection	IP67 (connectors correctly fitted)/IP68 (3 m/3 d) for cable outlet					
Shock test	100 g/11 ms, IEC standard 60068-2-27					
Vibration test	30 g/10...2000 Hz, IEC standard 60068-2-6 (excluding resonant frequencies)					
EMC test	Electromagnetic emission according to EN 61000-6-3					
	Electromagnetic immunity according to EN 61000-6-2					
	The GP5 sensors fulfill the requirements of the EMC directives 2014/30/EU, UKSI 2016 No. 1091 and TR CU 020/2011					
Magnet movement velocity	Magnet slider: Max. 10 m/s; U-magnet: Any; Block magnet: Any					
Design/Material						
Sensor electronics housing	Aluminum (painted), zinc die cast					
Sensor profile	Aluminum					
RoHS compliance	The used materials are compliant with the requirements of EU Directive 2011/65/EU and EU Regulation 2015/863 as well as UKSI 2022 No. 622 with amendments.					
Stroke length	25...6350 mm (1...250 in.)					
Mechanical mounting						
Mounting position	Any					
Mounting instruction	Please consult the technical drawings on page 4					
Electrical connection						
Connection type	1 × M16 male connectors (6 pin) or cable outlet					
Operating voltage	Standard: +24 VDC (-15/+20 %)/option: +9 VDC...+28.8 VDC; The GP5 sensors must be power supplied via an external Class 2 power source in accordance with the UL approval					
Power consumption	2.5 W typical (3.5 W maximum)					
Dielectric strength	500 VDC (DC ground to machine ground)					
Polarity protection	Up to −30 VDC					
Overvoltage protection	Up to 36 VDC					

1/ With position magnet # 251 416-2

FREQUENTLY ORDERED ACCESSORIES – Additional options available in our [Accessories Catalog](#) 551444

Position magnets			
			
Magnet slider S, joint at top Part no. 252 182	Magnet slider V, joint at front Part no. 252 184	Block magnet K Part no. 251 298-2	U-magnet OD33 Part no. 251 416-2
Material: GRP, magnet hard ferrite Weight: Approx. 35 g Operating temperature: –40...+85 °C (–40...+185 °F)	Material: GRP, magnet hard ferrite Weight: Approx. 35 g Operating temperature: –40...+85 °C (–40...+185 °F)	Material: XOLOX Neobond 50L Weight: Approx. 22 g Surface pressure: Max. 20 N/mm² Fastening torque for M4 screws: 1 Nm Operating temperature: –40...+105 °C (–40...+221 °F) This magnet may influence the sensor performance specifications for some applications.	Material: PA ferrite GF20 Weight: Approx. 11 g Surface pressure: Max. 40 N/mm² Fastening torque for M4 screws: 1 Nm Operating temperature: –40...+120 °C (–40...+248 °F)
Position magnets		Mounting accessories	
			
Block magnet L Part no. 403 448	Mounting clamp Part no. 400 802	T-nut Part no. 401 602	
Material: Plastic carrier with neodymium magnet Weight: Approx. 20 g Fastening torque for M4 screws: 1 Nm Operating temperature: –40...+75 °C (–40...+167 °F) This magnet may influence the sensor performance specifications for some applications.	Material: Stainless steel (AISI 304)	Fastening torque for M5 screw: 4.5 Nm	

Controlling design dimensions are in millimeters and measurements in () are in inches

Cable connectors*

Cables

			
M16 female connector (6 pin), straight Part no. 370 423	M16 female connector (6 pin), angled Part no. 370 460	PVC cable Part no. 530 032	PUR cable Part no. 530 052
Material: Zinc nickel plated Termination: Solder Cable Ø: 6...8 mm (0.24...0.31 in.) Operating temperature: -40...+100 °C (-40...+212 °F) Ingress protection: IP65/IP67 (correctly fitted) Fastening torque: 0.6 Nm	Material: Zinc nickel plated Termination: Solder Cable Ø: 6...8 mm (0.24...0.31 in.) Wire: 0.75 mm² (20 AWG) Operating temperature: -40...+95 °C (-40...+203 °F) Ingress protection: IP67 (correctly fitted) Fastening torque: 0.6 Nm	Material: PVC jacket; gray Features: Twisted pair, shielded, flexible Cable Ø: 6 mm (0.23 in.) Cross section: 3 × 2 × 0.14 mm² Bending radius: 10 × D (fixed installation) Operating temperature: -40...+105 °C (-40...+221 °F)	Material: PUR jacket; orange Features: Twisted pair, shielded, highly flexible, halogen free, suitable for drag chains, mostly oil & flame resistant Cable Ø: 6.4 mm (0.25 in.) Cross section: 3 × 2 × 0.25 mm² Bending radius: 5 × D (fixed installation) Operating temperature: -20...+80 °C (-4...+176 °F)

Cable

FEP cable Part no. 530 157

Material: FEP jacket; black
Features: Twisted pair, shielded
Cable Ø: 6.7 mm (0.26 in.)
Cross section: 3 × 2 × 0.14 mm²
Operating temperature: -40...+180 °C (-40...+356 °F)

*/ Follow the manufacturer's mounting instructions
Color of connectors and cable jacket may change. Color codes for the individual wires and technical properties remain unchanged.
Controlling design dimensions are in millimeters and measurements in () are in inches

Extension cables M16

PVC cable with M16 female connector (6 pin), straight – pigtail

PUR cable with M16 female connector (6 pin), straight – pigtail

FEP cable with M16 female connector (6 pin), straight – pigtail

PVC cable (part no. 530 032) with M16 female connector, straight (part no. 370 423)

PUR cable (part no. 530 052) with M16 female connector, straight (part no. 370 423)

FEP cable (part no. 530 112) with M16 female connector, straight (part no. 370 423)

Programming tools

Programming tools

- TempoLink® kit for Temposonics® G-Series V
 Part no. TL-1-0-AD60
 Part no. TL-1-0-AS00
- Connect wirelessly via Wi-Fi enabled device or via USB with the diagnostic tool
 - Simple connectivity to the sensor via 24 VDC power line (permissible cable length: 30 m)
 - User friendly interface for mobile devices and desktop computers
 - See data sheet “TempoLink® smart assistant” (document part no.: [552070](#)) for further information

Table 1: Number of circulations

NOTICE

- For GP5, the magnet selected in **b** "Design" is included in the scope of delivery. Specify the number of magnets for your application. For multi-position measurements with more than 1 magnet order the other magnets separately.
- The number of magnets is limited by the stroke length.
- The minimum allowed distance between magnets (i.e. of one to the front face of the next one) is 75 mm (3 in.).
- Use magnets of the same type for multi-position measurement.

DELIVERY

- Sensor
 - Position magnet (not valid for GP5 with design »O«)
 - 2 mounting clamps up to 1250 mm (50 in.) stroke length
- Accessories have to be ordered separately.

Manuals, Software & 3D Models available at:
www.temposonics.com

GLOSSARY

C

Closed Error Signal Utility

At very high shock or vibration events, the magnet may no longer be detected properly. For these error events the closed error signal utility will produce an output signal waveform that corresponds to a value of just over the 100 % full stroke position. Therefore, the Closed Error Signal Utility should only be used with certain Allen Bradley and Digitron Electronics interface cards that are designed to process this sensor output appropriately. Contact Applications Engineering for more information.

E

External Interrogation

For a sensor that is configured for external interrogation, a signal is required from the controller or interface module to initiate every measurement cycle.

I

Internal Interrogation

For a sensor that is configured for internal interrogation, no signal is needed from the controller as the sensor itself initiates the next measurement cycle upon the completion of the current cycle.
