Level Plus® – Chambered
Magnetostrictive Liquid Level Transmitters with Temposonics® Technology

- Designed for Magnetic Level Gauge (MLG)
- No scheduled maintenance or recalibration
- Hazardous area certified
MEASURING TECHNOLOGY

The absolute, linear position sensors provided by Temposonics rely on the company’s proprietary Temposonics® magnetostrictive technology, which can determine positions with a high level of precision and robustness. Each Temposonics® position sensor consists of a ferromagnetic waveguide, a position magnet, a strain pulse converter and supporting electronics. The magnet, connected to the object in motion in the application, generates a magnetic field at its location on the waveguide. A short current pulse is applied to the waveguide. This creates a momentary radial magnetic field and torsional strain on the waveguide. The momentary interaction of the magnetic fields releases a torsional strain pulse that propagates the length of the waveguide. When the ultrasonic wave reaches the end of the waveguide it is converted into an electrical signal. Since the speed of the ultrasonic wave in the waveguide is precisely known, the time required to receive the return signal can be converted into a linear position measurement with both high accuracy and repeatability.

CHAMBERED

The Level Plus® CHAMBERED level transmitter satisfies the demand for an accurate and robust liquid-level sensor with unsurpassed flexibility to meet most process application conditions. The CHAMBERED transmitter provides external measurement of most Magnetic Level Gauges (MLG) from popular suppliers. Once the transmitter is installed and calibrated there is no requirement for scheduled maintenance or recalibration. Set it and forget it!

Features:
- No scheduled maintenance or recalibration
- Integral display
- Intrinsically safe
- Explosionproof/Flame proof

Applications:
- Magnetic Level Gauge
- Bypass chamber

Markets:
- Petroleum and petrochemical
- Chemical
- Power generation

Compatible with:
- Houdec
- Hawk
- Bliss Anand
- Jerguson
- Kenco
- Wika
- Quest-tec
- Penberthy
- Klinger
- ISE Magtech
- ABB (K-tek)
- Bonetti
- SOR
- Krohne
- Nihon Klingage
- FOXC
- KSR Kuebler
- Shridhan

Controlling design dimensions are in millimeters and measurements in ( ) are in inches

1/ The ambient temperature rating, Ta = −50 °C (−58 °F) to 71 °C (160 °F), must not be exceeded due to the mounting of the level transmitter to the MLG and exposure to the process temperature.
