MH-Series MH CANbus Magnetostrictive Linear Position Sensors

- Stroke length up to 2500 mm
- Linearity < 0.04 % F.S. / Resolution typ. 0.1 mm
- High reliability due to EMC, shock & vibration resistance

MEASURING TECHNOLOGY

The absolute, linear position sensors provided by Temposonics rely on the company's proprietary magnetostrictive technology, which can determine position with a high level of precision and robustness. Each Temposonics position sensor consists of a ferromagnetic waveguide, a position magnet, a strain pulse converter and a supporting electronics. The magnet, connected to the object in motion in the application, generates a magnetic field at its location on the waveguide. A short current pulse is applied to the waveguide. This creates a momentary radial magnetic field and torsional strain on the waveguide. The momentary interaction of the magnetic fields releases a torsional strain pulse that propagates the length of the waveguide. When the ultrasonic wave reaches the beginning of the waveguide it is converted into an electrical signal. Since the speed of the ultrasonic wave in the waveguide is precisely known, the time required to receive the return signal can be converted into a linear position measurement with both high accuracy and repeatability.

MH SENSOR

Temposonics® sensors can be used in versatile mobile machines without any restriction and replace contact-based linear sensors like potentiometers. Highly dynamic systems are controlled safely by means of Temposonics® sensors, thus enhancing the productivity, availability and quality of the working process of the machine. Insensitive to vibration, shock, dust and weathering influence and electro-magnetic disturbances. Temposonics® MH sensors are successfully used in front axle and articulated frame steering cylinders, hydraulic jacks and in steering systems for hydraulic units on agricultural and construction machinery.

DESIGNED FOR THE MOBILE WORLD

MH sensors are designed for mobile machines and intended for IN cylinder use. They are validated in the field by worldwide OEM's and replace linear potentiometers and inductive sensors.

Connection schematic

To ensure proper operation of the sensor, the hydraulic cylinder must be connected to the machine ground. Grounding is often ensured by the mechanical contact between the cylinder and other machine elements. If the cylinder is connected with the machine separately, separate grounding, for example via a grounding strap directly on the cylinder must be ensured.

MECHANICAL INSTALLATION

Installation in a hydraulic cylinder

The robust Temposonics® MH sensor is designed for direct stroke measurement in hydraulic cylinders.

The Temposonics® MH sensor can be installed from the head side or the rod side of the cylinder depending on the cylinder design.

In both installation methods, the sensor seals the cylinder by using an O-ring and backup ring which is installed on the sensor housing.

([document part no. 552093](#))

NOTICE

Sealing:

- Take action against water ingress by sealing the cavity on the cover side.
- Cable glands should have IP69K rating.

Pressure:

- Do not exceed the operating pressure.

Avoid part collision:

- The bore depth in piston:
Null zone + stroke length + dead zone + > 3 mm
- The position magnet shall not touch the pressure pipe.
- Note the piston rod drilling:
- Ø 7 mm rod: ≥ Ø 10 mm
- Ø 10 mm rod: ≥ Ø 13 mm

Set screw

e.g. retaining with set screw (with flat point) ISO 4026 M5x10 (DIN 913).
Fastening torque: ≤ 0.5 Nm

Fig. 11: Set screw

NOTICE

Avoid sensor damage:

- The screw may touch the sensor housing.
- Tightening torque: ≤ 0.5 Nm.

Lock set screw:

- Lock the set screw against falling out.
- Make sure that the threads are free of oil, grease and dirt.

Sealing:

- Consider a seal against water ingress (capillary effect).

DELIVERY

- Position sensor
 - O-ring
 - Backup-ring
 - M12 connector system incl. M12 flange (when option selected)
 - DT connector system incl. connector assembly and retainer (when option selected)
- Accessories (e.g. position magnets) have to be ordered separately
