

# Tempsonics®

Magnetostrictive Linear Position Sensors

## R-Series V RH EtherNet/IP™ Data Sheet

- EtherNet/IP™ with CIP Sync and DLR
- Position + velocity measurements for up to 20 magnets
- Field adjustments and diagnostics using the new TempoLink smart assistant

I AM THE NEW GENERATION

## MEASURING TECHNOLOGY

The absolute, linear position sensors provided by MTS Sensors rely on the company's proprietary Temposonics® magnetostrictive technology, which can determine position with a high level of precision and robustness. Each Temposonics® position sensor consists of a ferromagnetic waveguide, a position magnet, a strain pulse converter and supporting electronics. The magnet, connected to the object in motion in the application, generates a magnetic field at its location on the waveguide. A short current pulse is applied to the waveguide. This creates a momentary radial magnetic field and torsional strain on the waveguide. The momentary interaction of the magnetic fields releases a torsional strain pulse that propagates the length of the waveguide. When the ultrasonic wave reaches the end of the waveguide it is converted into an electrical signal. Since the speed of the ultrasonic wave in the waveguide is precisely known, the time required to receive the return signal can be converted into a linear position measurement with both high accuracy and repeatability.

Fig. 1: Time-of-flight based magnetostrictive position sensing principle

## R-SERIES V ETHERNET/IP™

Temposonics® R-Series V brings very powerful sensor performance to meet the many demands of your application. This series is the long term solution for harsh environments having high levels of shock and vibration. The EtherNet/IP™ sensor supports CIP Sync™ (Common Industrial Protocol) and DLR (Device Level Ring) capabilities. CIP Sync™ offers synchronization between devices in an EtherNet/IP™ network, allowing for increased control coordination in time-critical applications. DLR capability provides a fault-tolerant network so that the sensor can be used in ring connection topologies when reliable continuous system operation is required. In addition, the sensors are available with internal linearization which offers improved linearity for overall higher accuracy of the position measurement values.

With many outstanding features the R-Series V sensors are fit for a very broad range of applications.

## TempoLink YOUR SMART ASSISTANT

The TempoLink smart assistant is an accessory for the R-Series V family of sensors that supports setup and diagnostics. Depending on the sensor protocol it enables the adjustment of parameters like measurement direction, resolution and filter settings. For diagnostics and analysis of operational data the R-Series V sensors continuously track values such as total distance traveled by the position magnet, internal temperature of the sensor and the quality of the position signal. This additional information can be read out via TempoLink smart assistant even while the sensor remains operational in the application.

The TempoLink smart assistant is connected to the sensor via the power connection, which now adds bidirectional communication for setup and diagnostics. The TempoLink smart assistant is operated using a graphical user-interface that will be displayed on your smartphone, tablet, laptop or PC. Just connect your Wi-Fi-enabled device to TempoLink Wi-Fi access point and go to the website URL for the user-interface.

## TECHNICAL DATA

Output				
Interface	EtherNet/IP™			
Data protocol	Encoder CIP device profile with CIP Sync and DLR capabilities			
Data transmission rate	100 MBit/s (maximum)			
Measured value	Position, velocity / option: Simultaneous multi-position and multi-velocity measurements up to 20 magnets			
Measurement parameters				
Resolution: Position	1...500 µm (selectable)			
Cycle time	Stroke length	≤ 2000 mm	≤ 4800 mm	≤ 7620 mm
	Cycle time	1.0 ms	2.0 ms	3.0 ms
Linearity deviation <sup>1</sup>	Stroke length	≤ 500 mm	> 500 mm	
	Linearity deviation	≤ ±50 µm	< 0.01 % F.S.	
Repeatability	< ±0.001 % F.S. (minimum ±2.5 µm) typical			
Hysteresis	< 4 µm typical			
Temperature coefficient	< 15 ppm / K typical			
Operating conditions				
Operating temperature	-40...+85 °C (-40...+185 °F)			
Humidity	90 % relative humidity, no condensation			
Ingress protection	IP67 (connectors correctly fitted)			
Shock test	150 g / 11 ms, IEC standard 60068-2-27			
Vibration test	30 g / 10...2000 Hz, IEC 60068-2-6 (excluding resonant frequencies)			
EMC test	Electromagnetic emission according to EN 61000-6-3			
	Electromagnetic immunity according to EN 61000-6-2			
	The sensor meets the requirements of the EC directives and is marked with <b>CE</b>			
Operating pressure	350 bar (5076 psi) / 700 bar (10153 psi) peak (at 10 × 1 min) for sensor rod			
Magnet movement velocity	Any			
Design / Material				
Sensor electronics housing	Aluminum (painted), zinc die cast			
Sensor flange	Stainless steel 1.4305 (AISI 303) / RH5-J: Stainless steel 1.4305 (AISI 303)			
Sensor rod	Stainless steel 1.4306 (AISI 304L) / RH5-J: Stainless steel 1.4301 (AISI 304)			
Stroke length	25...7620 mm (1...300 in.)			
Mechanical mounting				
Mounting position	Any			
Mounting instruction	Please consult the technical drawings on <a href="#">page 4</a> and the operation manual (document number: <a href="#">551971</a> )			
Electrical connection				
Connection type	2 × M12 female connectors (5 pin), 1 × M8 male connector (4 pin), 2 × M12 female connectors (5 pin), 1 × M12 male connector (4 pin)			
Operating voltage	12...30 VDC ±20 % (9.6...36 VDC) <sup>2</sup>			
Power consumption	Less than 4 W typical			
Dielectric strength	500 VDC (DC ground to machine ground)			
Polarity protection	Up to -36 VDC			
Overvoltage protection	Up to 36 VDC			

1/ With position magnet # 251 416-2

2/ Power supply must be able to provide current of 1 A for power up process

<b>h</b>	<b>Output</b>
U 2 0 1	EtherNet/IP™, position and velocity (1...20 positions)
U 2 1 1	EtherNet/IP™, position and velocity, internal linearization (1...20 positions)

### NOTICE

- For applications using more than 1 magnet, order the additional magnets separately.
- The number of magnets is limited by the stroke length. The minimum allowed distance between magnets (i.e. front face of one to the front face of the next one) is 75 mm (3 in.).
- Use magnets of the same type for multi-position measurement, e.g. 2 × U-magnets (part no. 251 416-2).

## DELIVERY

### RH5-B:

- Base unit (without flange/rod assembly)

Accessories have to be ordered separately.

### RH5-J / -M / -S / -T:

- Sensor
- O-ring

Manuals, Software & 3D Models available at:  
[www.mtssensors.com](http://www.mtssensors.com)

\* / Non standard stroke lengths are available; must be encoded in 5 mm / 0.1 in. increments
